

Collaboration Toolkit

Pledge to Young People

The Pledge to Young People sets out the commitment from the highest levels of each Youth Engagement Alliance member agency to support every young Queenslander to engage with education, training and work. It empowers everyone working in Queensland Government agencies to pursue collaborative approaches and holistic case-management to support vulnerable and disengaged young people.

Inter-agency Collaboration Guide

The Inter-agency Collaboration Guide supports frontline staff to undertake collaborative approaches in their case-management of vulnerable young people. The Guide includes information on how to scale collaboration and establish appropriate governance arrangements, case studies of current practice, and tools and templates that facilitate collaboration. Staff may use this resource to enhance or begin collaborative efforts within their work and share it amongst their colleagues to promote further opportunities for improved collaboration.

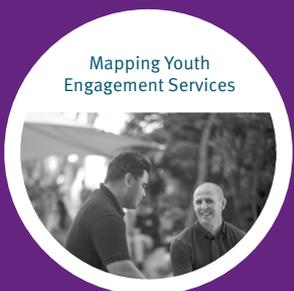

Collaboration in Practice Videos

The Collaboration in Practice Videos feature three different examples of collaborative responses to local youth engagement challenges in Queensland. The videos build upon some of the case studies in the Inter-agency Collaboration Guide, featuring advice and strategies for achieving collaborative outcomes and holistic case-management to support disengaged young people to overcome a range of barriers and re-engage with education, training or work.

Information Sharing Charter

The Information Sharing Charter works alongside the Inter-agency collaboration guide to support staff from all agencies to work together to deliver holistic support services for young people. It sets out key information about privacy legislation and the legislative frameworks each agency must operate within, as well as providing a number of helpful templates and tools to support staff to undertake information sharing in their collaborative endeavours.

Youth Engagement Service Mapping

The Youth Engagement Service Mapping provides a point-in-time overview of youth engagement services and resources available at the local level. The maps provide frontline staff with a better understanding of the youth engagement resources and initiatives available in their local area to support vulnerable and disengaged young people.
